footprint®
The smart metering platform

Account for every drop in your organisation. Track your water usage and identify anything out of the ordinary with footprint®, the smart metering platform. Built for businesses, this powerful web-based solution gives you real-time reporting wherever and whenever you need it.

With footprint®, you can now better manage risk and compliance, operate more efficiently and minimise your carbon footprint. And to top it all, enhance your brand value and reputation.

How does footprint® work?

Installation and maintenance
We install data loggers on your metered assets.

Data hosting and IT support
The loggers capture your consumption data and transfer it to our secure, central server using existing communication networks.

Monitoring and detection
You receive alerts and automated reports via email or SMS. Use a unique login to access your detailed dashboards anytime, anywhere.

With footprint® you can:

- Receive insights into how much water your organisation is using.
- Enable your teams to develop, monitor and assess water-saving initiatives. Reduce your water bills and minimise wastage of our precious resource.
- Instantly identify leaks, surges and unaccounted flows and take corrective action before it impacts your business and the environment.
- Get quick, easy access to real-time site data – anywhere, anytime on your PC, phone or tablet.
- Manage risk and compliance.
- Improve operational efficiency and increase profits.
- Achieve environmental KPIs such as NABERS, NGERS, Water efficiency, etc.

Customise alerts and notifications

With footprint®, you can customise SMS and email notifications against pre-set parameters. Receive instant alerts when parameters are exceeded.

Understand your usage

Be in the know about your water usage 24/7 helping to detect background leaks or unusual usage.

Want to know your monthly usage?

With footprint®, you can analyse trends around your monthly usage and compare to previous periods. And with our secure central data storage system, you can easily trace historical and trend data to make informed decisions.

Reporting

Take advantage of footprint®'s tools and reporting features to gain key insights into your organisation's water consumption. You can customise data and display it in rich graphical formats to measure usage against your business KPIs.

Who are we?

Iota is your water and wastewater management partner.

We're owned by South East Water, a Victoria, Australia-based water utility. We develop and commercialise innovations proven within the South East Water network, so we can bring them to organisations like yours.
